

Save time, apply online with Assureweb

Myths about using Assureweb

[Click here](#) to see the three easy steps to applying through www.assureweb.co.uk

- **Quotes & commission are not the same on Assureweb as provider extranets**

The quotes that you obtain through Assureweb come directly from product providers so they will be identical to those you would receive from them directly. This is also true of commission rates as again these come directly from the providers.

- **All portals cost the same**

Assureweb is free to use for advisers. So whether it's an annuity quote or you want to apply for some income protection, it won't cost you a penny through Assureweb. Some rival portals charge a monthly fee and even a further cost per quote. We estimate a typical financial adviser can save over £400 a year just by switching to Assureweb.

- **Assureweb is not for me**

We continue to innovate, improve our service and win awards. And with more than 80% of users, in a recent survey, happy to recommend us why not give us another try and see how we can save you time and money by quoting and applying online.

- **Assureweb doesn't have wide product coverage**

We are increasing the products and providers on the portal all the time. Recent additions include a new equity release quote comparison service and a real-time annuities service. And with a detailed quote annuity service due to launch in October we really do have all the products your clients will need. [Click on this link to see a summary of our product and provider coverage](#)

- **This is just another system to learn**

Assureweb is easy to use and training is free. Give us a try or call our training helpline on 0845 408 2804. By investing 15 minutes of your time in some FREE training you could save yourself hours every week.

- **Assureweb won't work with my back office system**

At Assureweb we pride ourselves on the number of back office and POS systems we integrate with. Assureweb specialises in developing user friendly quotation and application services, leaving our expert "best of breed" technology partners, with whom we cleanly integrate our services, to develop their CRM and point of sale systems.
